In the U.S. and around the world, people are not getting the care they need, when they need it, for complex but treatable conditions.

Moving Knowledge, Not Patients

Through telementoring, ECHO builds capacity and creates access to high-quality specialty care serving local communities.

Hub and spoke knowledge-sharing networks create a learning loop:

Community providers learn from specialists.

Community providers learn from each other.

Specialists learn from community providers as best practices emerge.
