

NMAETC- IHS HIV TeleECHO Clinic

There is overwhelming evidence that people living with HIV achieve better healthcare outcomes when they are treated by providers that are knowledgeable in HIV, as well as when they are treated in their own communities. The NMAETC-IHS HIV TeleECHO Clinic unites a multidisciplinary team of HIV experts with healthcare providers treating American Indian/Alaska Native patients with HIV or at risk of acquiring HIV in rural and underserved areas. A short didactic training presentation that is relevant to HIV providers starts the hour long teleECHO clinic. Individual cases are presented by treating providers and discussed by the group to provide consultative advice on the clinical management of HIV patients. Relevant peer-reviewed articles, literature, and resources are circulated to enhance participants' knowledge base and continuing medical education credits are provided.

How to Participate in our teleECHO clinic

Online registration

- Participate in didactic presentations
- Present patient/client cases via Zoom video connection or by telephone
- Participants may be asked to complete periodic surveys evaluating practice-style, knowledge, and self-efficacy related to the treatment of HIV
- For more information, contact Amanda Dezan at ihsecho@salud.unm.edu

NMAETC-IHS HIV TeleECHO™ Clinic

July 2016-June 2017

NMAETC-IHS HIV TeleECHO Clinic

Project ECHO® & New Mexico AIDS Education and Training Center welcome you to participate in the monthly NMAETC - IHS HIV TeleECHO Clinic. The curriculum is designed to help providers become familiar and then proficient in the treatment of HIV in a primary care setting. We encourage providers to present cases for discussion. CME/CEU are available for each hour session for those who complete online evaluation forms.

Who is eligible to participate in the NMAETC-IHS HIV teleECHO clinic?

Healthcare providers (including physicians, physician assistants, nurse practitioners, nurses, medical assistants, pharmacists, social workers, case managers, mental health specialists, nutritionists, prevention specialists, public health staff, etc.) with an interest in HIV who complete the online teleECHO registration. All participants are also asked to complete an online PIF (Participant Information Form) once a year and evaluations for each teleECHO clinic attended. For confidentiality, HIPPA compliance, and professionalism, please identify yourself when you sign in to each teleECHO clinic so that we can verify that you are a qualified health care professional. TeleECHO clinics are not open to the general public or patients.

Course Schedule — 2nd Wednesday of each month from 12:00-1:00 PM, Mountain Time.

For More Information— contact Amanda Dezan at ihsecho@salud.unm.edu

Jonathan Iralu, MD

Dr. Iralu is the Indian Health Service Chief Clinical Consultant for Infectious Diseases and is a faculty member in the Department of Global Health Equity at Brigham and Women's Hospital at Harvard Medical School in Boston, MA. He has a special interest in rural HIV and tuberculosis care delivery at rural American Indian facilities. He has worked for the Indian Health Service since 1994 in Gallup, New Mexico at Gallup Indian Medical Center.

Additional Trainings

- IHS HCV TeleECHO Clinic every 1st & 3rd Wednesday of the month, 12:00-1:00 PM Mountain Time
